

CAT- 2000 WALL MOUNTED MODEL

PREMIER-2

PRIMIERS Wall mounted cat climbing tree is our entry level for big and small cats who like to climb up and down. Extremely robust and strong, easy to assemble. Components from our part list can easily be changed to build your own system with fantasy produced by top quality material, Sisal mats with rubber backing, Which can give you more durability. It is special quality and all the pillars in 13.3cm diameter with different length and 6mm wall thickness of mats with European and USA patented and Danish design Product, All are made in virgin HIPS & Glass filled material. Plywood in 18 mm thickness. Further all ply-wood are cover with plush-fur Material. Your Pet is bound to discover the perfect place to chill out. Also offer the perfect position to observe the actions of her human co-habitants

Profiling wall mounted cat trees are new generation of modern and innovation cat trees. The Suspended installation on the wall gives these cat trees a particularly aesthetic appearance. Despite only taking up a minimal amount of space, they have everything your cat's heart desires. Suspended wall mounted cat trees leave a space underneath the cat tree-Which can be used for other things-and it makes a huge difference to your cleaning efforts in day to day life.

Profiling wall mounted cat trees combine design and a well-thought out cat friendly layout.

NOTE: The wall intended for the installation must be sufficiently stable to stand up to the weight of the cat tree. Hollow walls are not suitable. Please note that any cat trees assembled from our modules, an intermediate plate, or any desired platform, must be placed between the wall brackets and sisal scratch post.
